**Diagnostics** — More information about the performance of your application. These numbers don't <u>directly affect</u> the Performance score.

Does not use HTTP/2 for all of its resources — 3 requests not served via HTTP/2

Serve static assets with an efficient cache policy — 7 resources found	~
Avoid chaining critical requests — 4 chains found	~
User Timing marks and measures — 537 user timings	~
Keep request counts low and transfer sizes small — 14 requests • 957 KB	~
Largest Contentful Paint element — 1 element found	~
Avoid large layout shifts — 5 elements found	~
Passed audits (21)	~

# Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

**Names and labels** — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

Additional items to manually check (10) — These items address areas which an automated testing tool cannot cover. Learn where in our guide on conducting an accessibility review.
